

Status Report: February 4, 2019

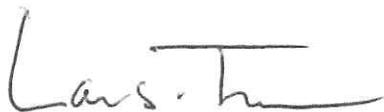

**Fechko Concrete Crushing Operation - Environmental Impact Assessment (EIA) Project
Medina City Lot 6774**

Labyrinth Management Group, Inc. (LMG) initiated work on the City of Medina's requested Environmental Impact Assessment (EIA) for the Fechko Excavating, LLC (Fechko) concrete operations located on the Medina City Lot 6774 in January 2019. To date, LMG has completed the following tasks:

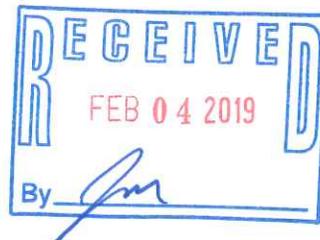

- Field preparation including initial communications with Fechko on site layout and equipment review.
- Obtained site access agreements for performance of EIA monitoring at adjacent properties Fire Dex, LLC and SP State St, LLC (the apartments).
- On January 3, 2019, conducted site operations and crushing equipment onsite review with Fechko personnel. Included scoping of noise and air monitoring locations.
- On January 7 and 9, 2019, completed noise dosimeter monitoring of active concrete crushing operations for evaluation of offsite noise impacts at two (2) fixed perimeter locations for approximately 6 hours per day. During fixed dosimeter monitoring LMG staff also collected noise survey data at multiple points in all directions from the concrete crusher equipment.
- On January 10, 2019, completed background noise dosimeter monitoring of the levels of noise at the same two (2) fixed perimeter locations where noise levels were obtained on January 7th and 9th when Fechko crushing operations were not being conducted.
- Downloaded noise dosimeter data, conducted initial analysis, and prepared draft noise survey results map.
- Currently, scheduling completion of air monitoring and air sampling tasks when snow and rain is not occurring.

LMG currently anticipates completion of the remainder of the EIA fieldwork by the end of February 2019 and issuance of the EIA report by the middle of March 2019.

Respectfully,
Labyrinth Management Group, Inc.
